BACKGROUND

In 2010 and 2019, the Japanese government excluded Korean schools from free educational programs, echoing a long-standing pattern of discrimination. During the COVID-19 pandemic, the government provided a college student support program for those experiencing economic hardship. The government again excluded the benefit for Korean university students.

These are clear violations of the equal educational rights for Korean students guaranteed regardless of origin, sex, age, religion, and more. Join us in protesting this discrimination as well as Japan's dumping of nuclear waste!
